

Project Name: Functional Testing of OrangeHRM**Test Engineer: Areej****Date: 1 October 2024****Project Description:**

The project involves conducting functional testing on the OrangeHRM Demo, a Human Resource Management System. The primary goal is to validate the proper functioning of key features, such as login, employee management, leave management, and time tracking, ensuring they operate without defects. This process includes creating and executing test cases, documenting any defects found, and summarising the findings and recommendations for the Software Quality Assurance (SQA).

1. Introduction**Objective:**

To perform functional testing on the OrangeHRM Demo system to ensure that key features such as login, employee management, leave management, and time tracking operate correctly without defects.

Scope:

The testing covers the following modules and functionalities:

1. Login Verification
2. Admin Dashboard / User Management
3. Organisation
4. Qualifications
5. Nationalities and Corporate Branding
6. Categories
7. Side Bar Functionalities
8. Header Functionalities

Testing Process:

1. **Create Test Cases:** Define detailed test cases for each functionality.
2. **Execute Test Cases:** Perform the tests as per the defined cases.
3. **Report Defects:** Log any defects found during testing.
4. **Summary & Recommendations:** Provide a summary of findings and suggest improvements.

The functional testing of the OrangeHRM Demo has been successfully conducted, covering the major features such as login, user management, job roles, organisation information, qualifications, sidebar functionalities, and header actions. The testing process involved creating detailed test scenarios and executing them thoroughly to ensure all functionalities are working as expected. Defects, if found, were logged and reported effectively, providing an accurate representation of the application's reliability.

In conclusion, the OrangeHRM Demo is verified for its key features, and a summary report of findings and recommendations has been prepared to support further optimization and to enhance the overall quality of the software. The detailed test execution results demonstrate a strong adherence to the expected behavior, contributing to improved usability and user satisfaction.
